

**ABSTRACT:**

The invention relates to a system comprising a speech processor for controlling an apparatus (101) with speech commands. The system according to the invention includes a remote control (102) having a microphone (104) for the input speech commands. The system also includes a further microphone (107) for enabling other users of the system to issue speech commands too. The system may have input designation means (105) for user operably designating said microphone (104) and/or said further microphone (170) as a signal source to the speech processor.
